# PLAY WIN EARN

Bit Rivals is an eSports tournament hosting and creation platform with a feature packed gamer ecosystem, powered by the non-deflationary \$RIVAL token.

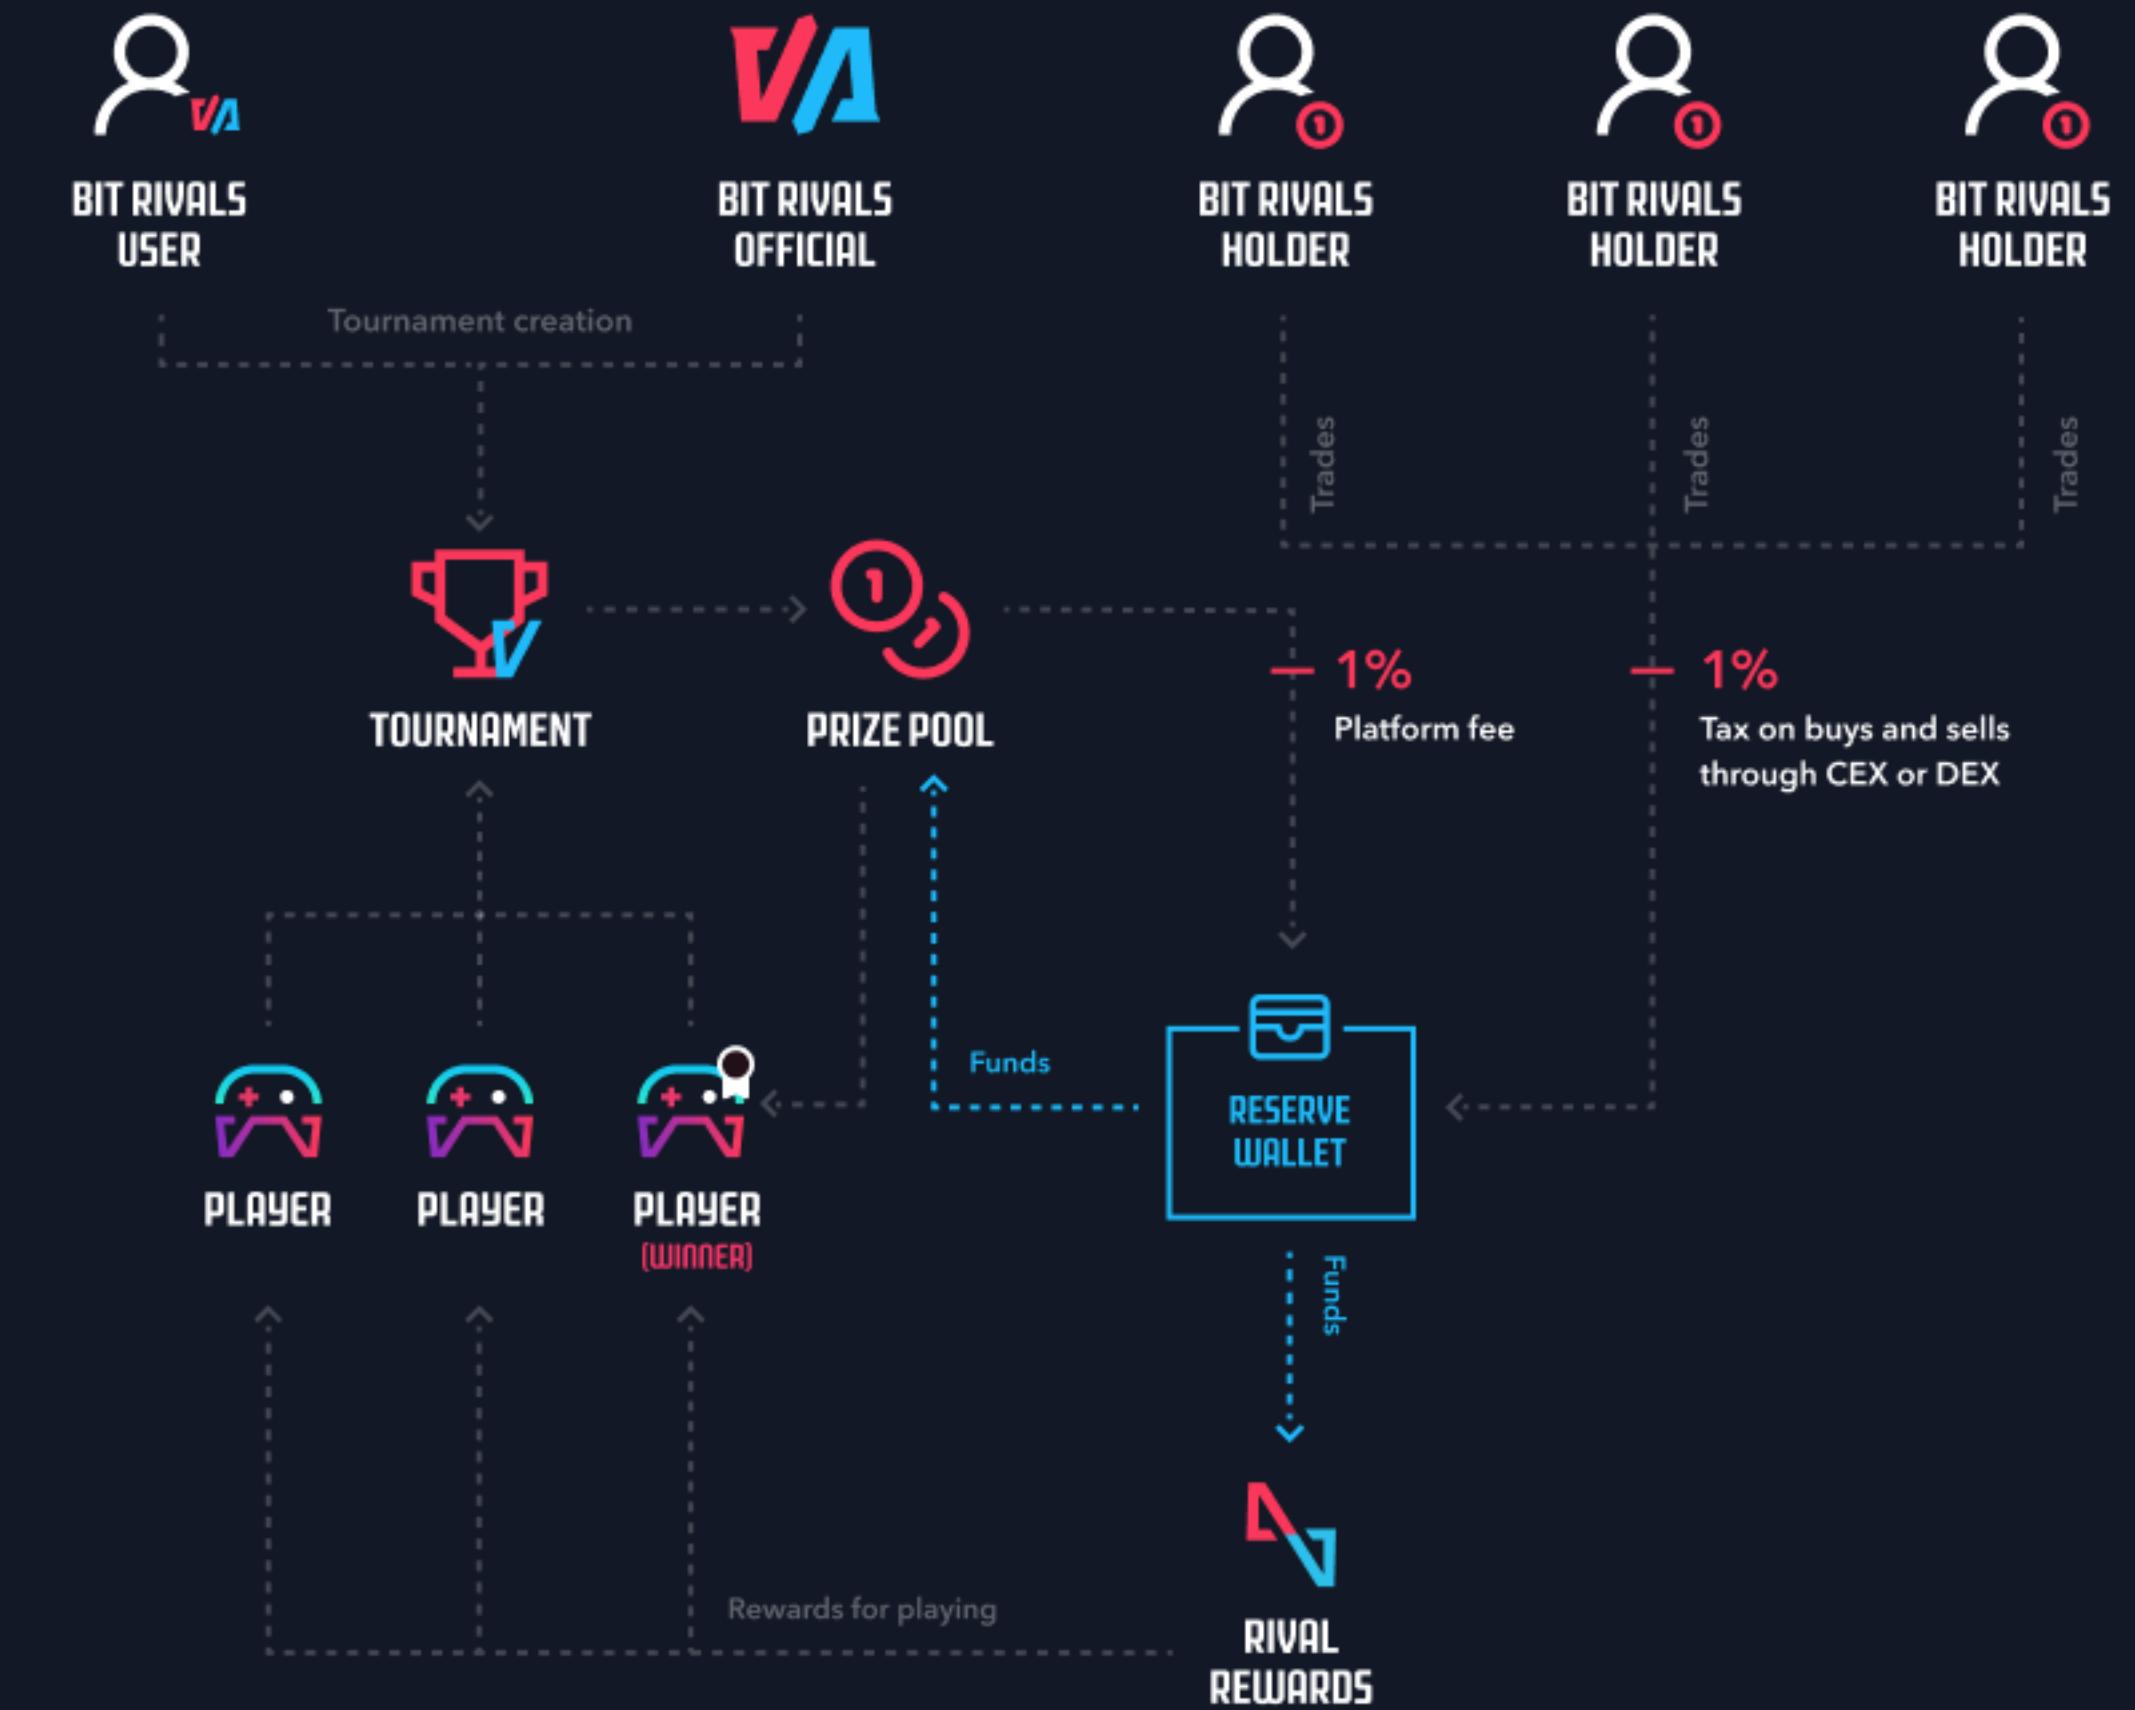

Compete, be rewarded, be social, buy loot, customise your profile, squad up and much more.

# HOW IT WORKS

The Bit Rivals ecosystem is funded by the reserve wallet.

The reserve wallet is contributed to whenever a buy or sell of \$RIVAL is made outside of the Bit Rivals platform or, when \$RIVAL is spent on the platform. This wallet then funds our official and automatic tournaments and Rival Rewards.

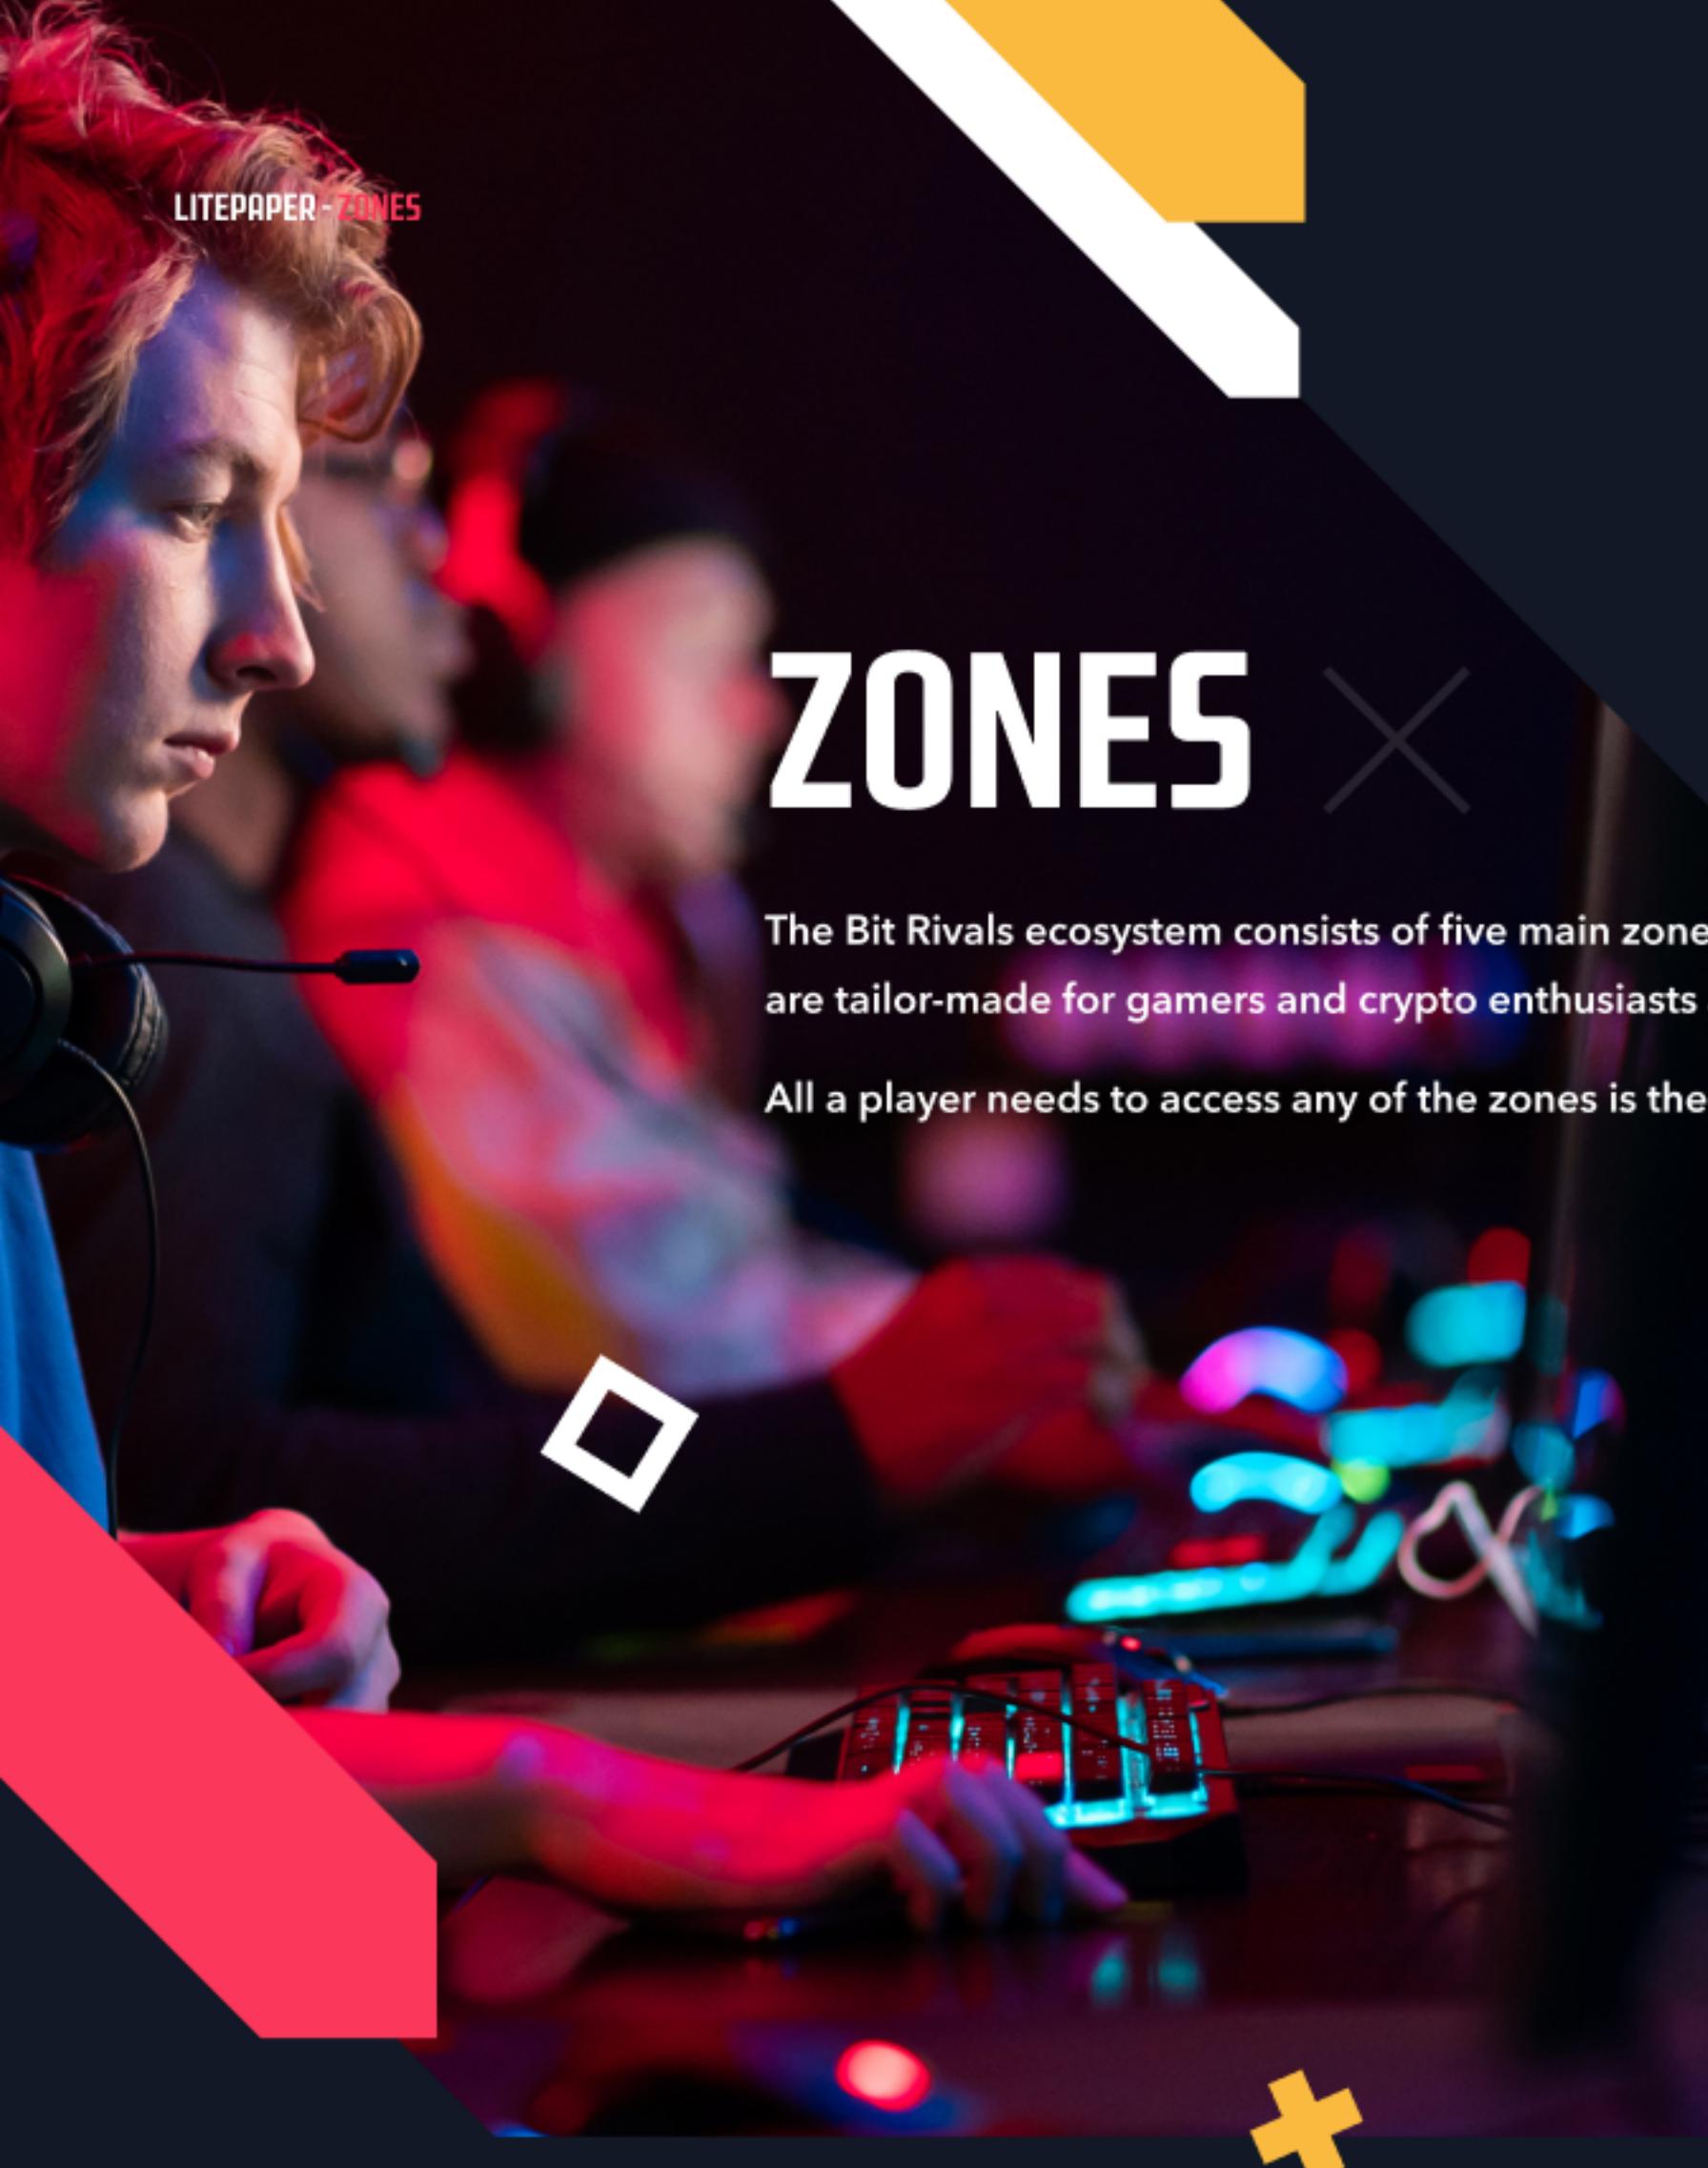

BIT RIVALS

# ZONES

The Bit Rivals ecosystem consists of five main zones, all of which are tailor-made for gamers and crypto enthusiasts alike.

All a player needs to access any of the zones is their Rival ID.

## RIVAL ARENA

Players can join official Bit Rivals tournaments, community hosted tournaments or create their own, with friends and community members. Play for free to win \$RIVAL tokens or wager their stake to win big.

## RIVAL SWAP

Bit Rivals' own DEX tool that enables swapping, staking, liquidity pool farming and more. Swap fees are also used to fund the tournament wallet.

## RIVAL ROSTER

Compare player stats and Rival Rank with others, view global and game specific leaderboards, recruit them into their eSports team, trade collectibles or just have a chat.

## RIVAL LOOT

Spend \$RIVAL on the latest Bit Rivals merchandise or splash out on unique upgrades such as avatars, avatar trims, profile backgrounds, profile titles and much more. Players can even mint their own NFTs!

## RIVAL REWARDS

A points based rewards system that allows players to earn points by participating in tournaments or by simply playing their favourite games.

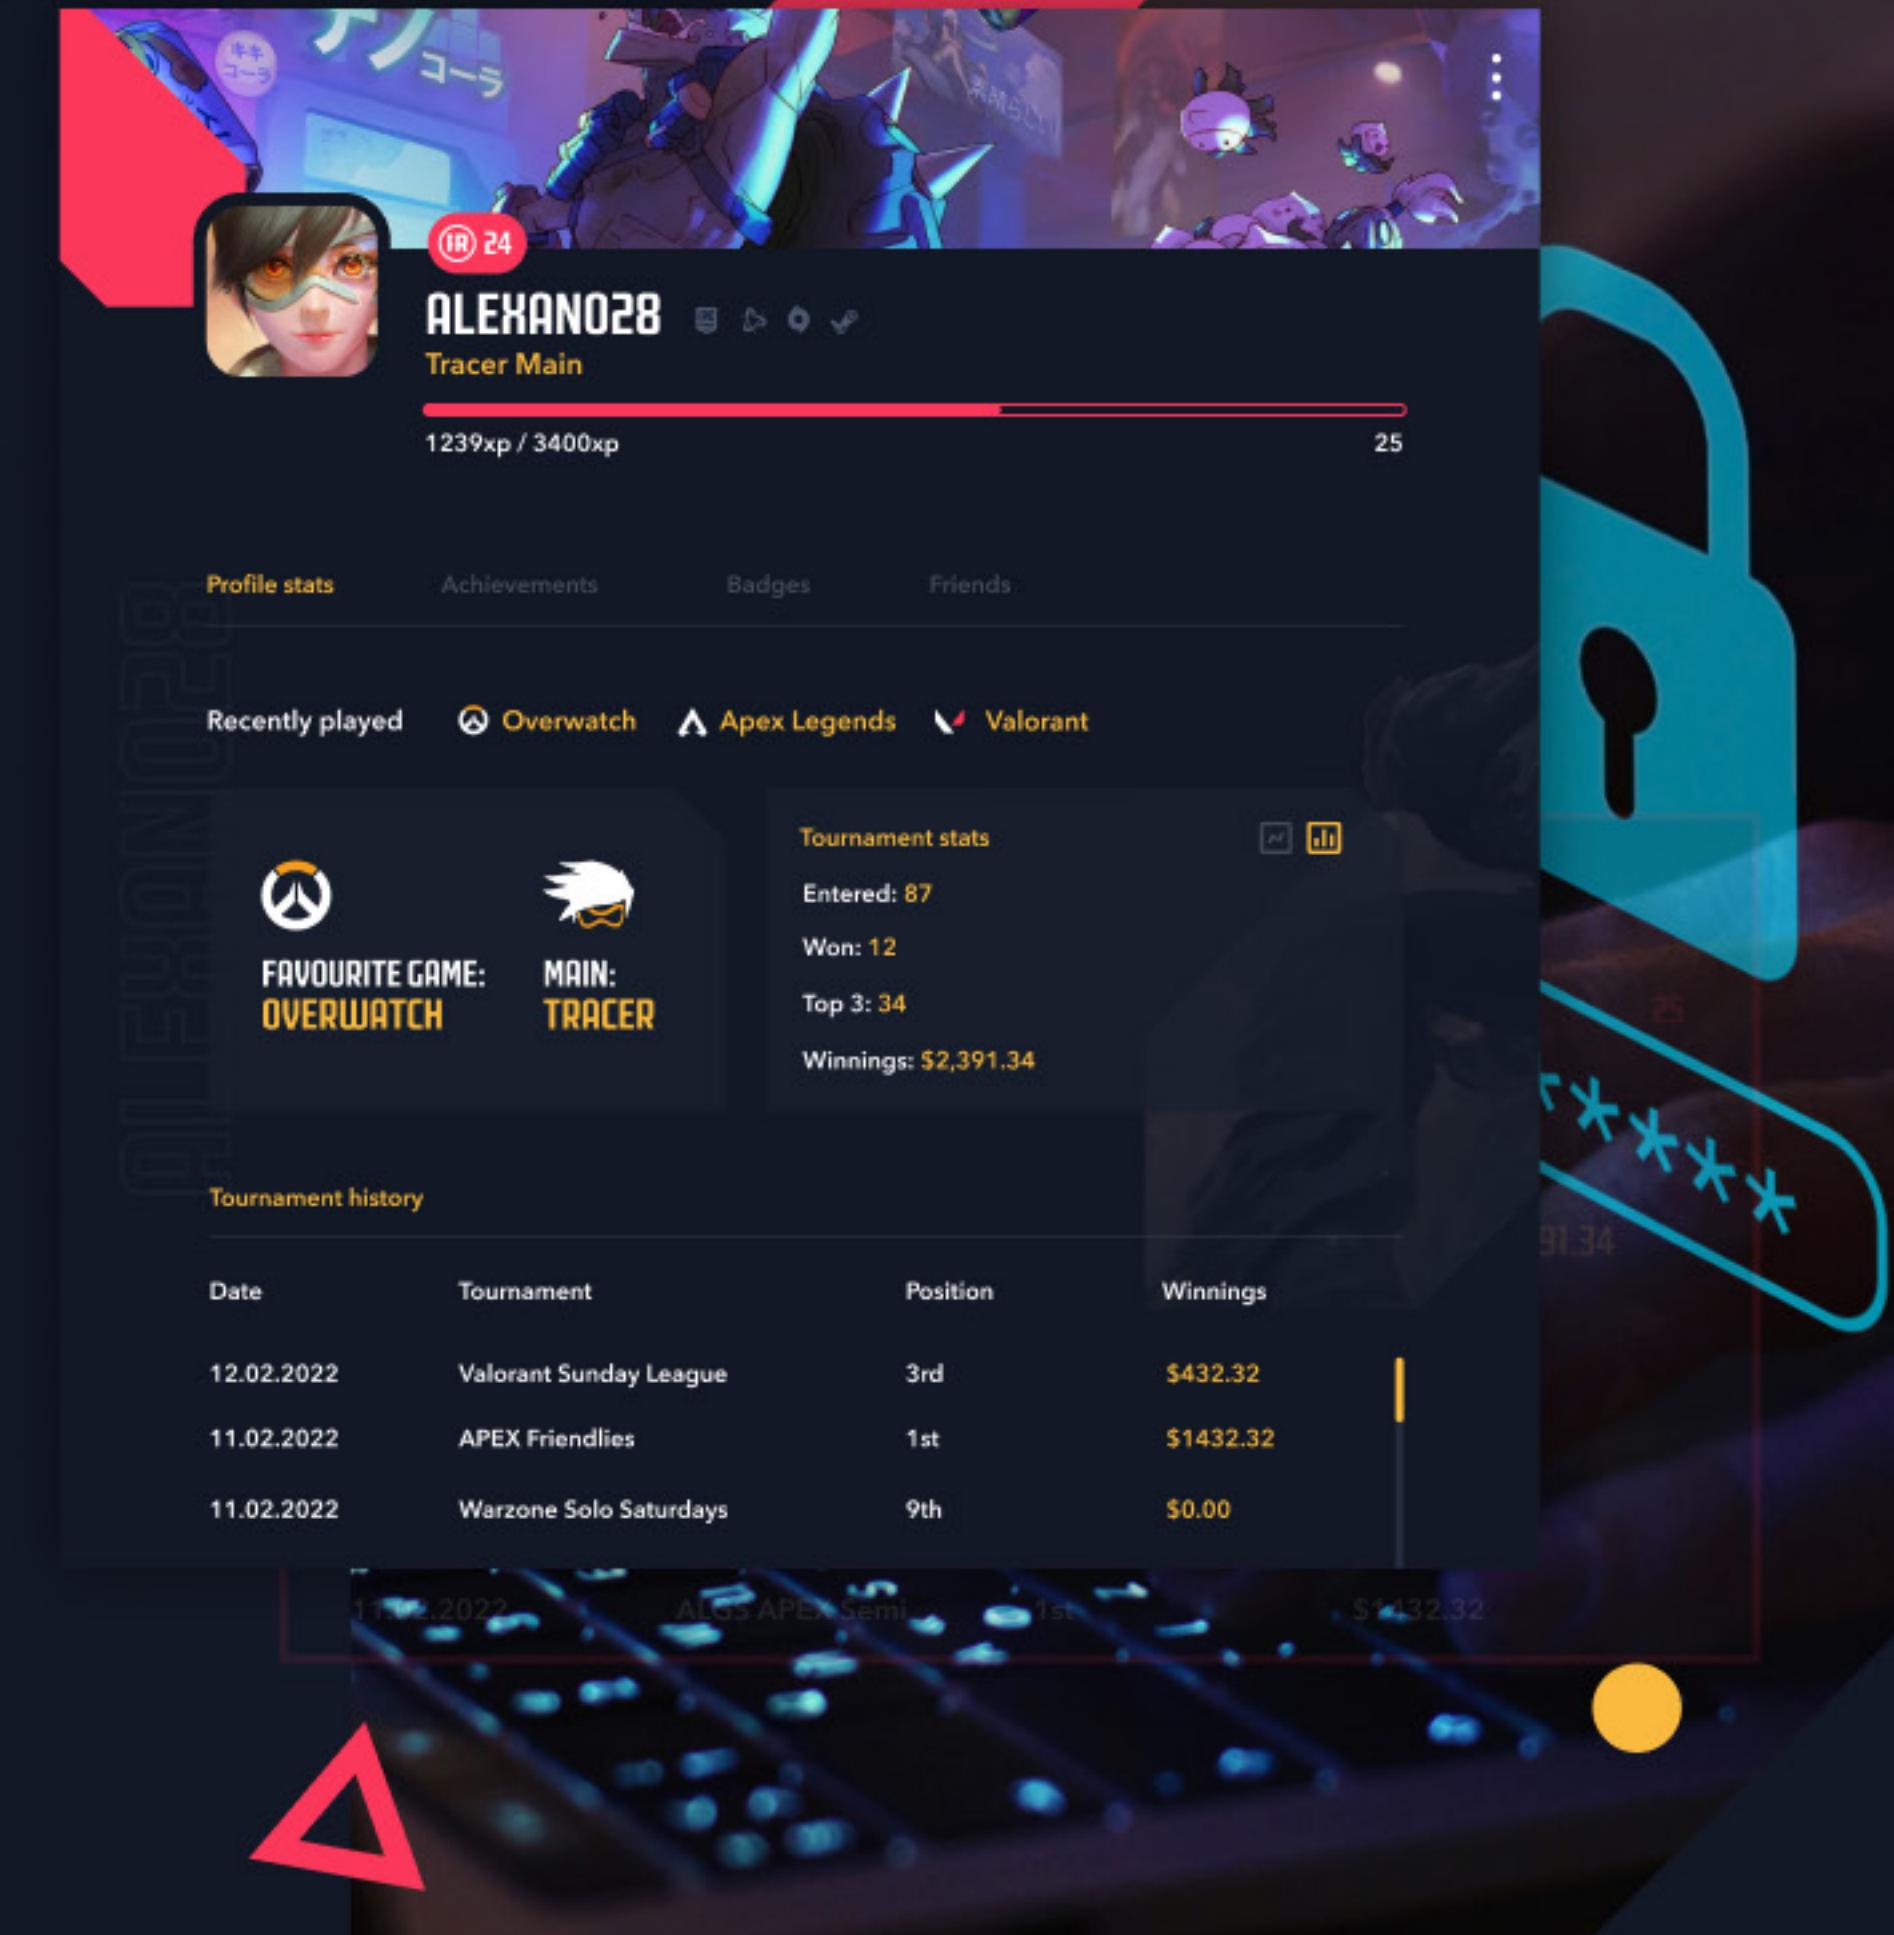

# RIVAL ID

A player's Rival ID is their gateway to the Bit Rivals ecosystem.

On creation of their ID, players are given a public profile which will become their ultimate gamer record.

These profiles are completely customisable using many of the cosmetics found across the platform and is home to the player's badge and trophy collections. Players can integrate their profile with their crypto wallet, add their gamer tags across all their favorite games and even add information on their favorite in-game characters or roles!

As a player participates in tournaments and interacts with the rest of the ecosystem, they will gain XP towards their Rival Rank. The ultimate status symbol on Bit Rivals.

# RIVAL ARENA

Rival Arena is the heart of Bit Rivals. This zone allows users to create their own tournaments for the games of their choice and host them either publicly or privately.

Tournaments come in two types:

## OFFICIAL BIT RIVALS TOURNAMENTS

Official tournaments use the reserve wallet to fund the prize pool. These tournaments are free for anyone to join.

## USER CREATED TOURNAMENTS

Any Bit Rivals user can create their own public or private tournaments. They can set the time and date, player cap, entry cost and more. Reputable organisers will also have the option to fund their tournaments from the tournament wallet and earn an organisation fee!

# RIVAL SWAP

Rival Swap is our very own DEX tool that allows you to swap, stake, and farm \$RIVAL.

## Swap

Find the best rates for exchanging \$RIVAL token to use across the ecosystem.

## Farming

Find the best reward rate when adding \$RIVAL and \$BNB as a liquidity pair and gain interest on trading fees.

## Pools

Stake \$RIVAL to yield the highest single asset APY on your investment.

## Bridge

Our cross-chain functionality. Exchange BSC \$RIVAL for pegged \$RIVAL tokens on other chains, such as Ethereum, Matic, or Cardano.

# STAKING AND LP REWARDS

The \$RIVAL smart contract has a built in passive reward incentive system for holders. Investors can either stake the \$RIVAL assets alone in normal or auto-compounding staking pools or pair \$RIVAL tokens with \$BNB tokens to receive rewards for providing liquidity.

\$RIVAL rewards tokens start off as 40% of total supply and are automatically replenished through transaction fees on buys and sells. Earn high APY on your \$RIVAL tokens by holding and contributing to staking pools or liquidity pools.
